Kristian Ceder

FULL STACK DEVELOPER

Profile

Results-driven and passionate full stack developer with proven ability to solve complex problems and deliver innovative solutions. Highly adaptable with exceptional social skills. Demonstrated technical skills in JavaScript, React, Node.js, Typescript, PHP, C, HTML, CSS, MySQL and more. Background in economics.

Education

Software Developer, Hive Helsinki

OCTOBER 2021 — DECEMBER 2022

Project-based peer-to-peer school that has proven to grow future-proof professionals. I specialized in web technologies after starting my studies with old-school **C**. Projects I'd like to highlight:

· **Hypertube** - A full stack torrent streaming service. My final Hive project. Our three person team decided to use **React** and **Node.js.** Styling with **Tailwind.**

· **Matcha** - A dating app similar to Tinder. Full stack project build in a team of two. The main technologies used were **React** and **Node.js** Database with · **MySQL**. Using APIs, web sockets and new frameworks were some of the most fun parts of creating this project.

Economics, University of Helsinki

AUGUST 2013

- · Accepted to study economics in faculty of Social Sciences in 2013
- · Basics of Programming 2020, **Java** · Elements of **AI** and Ethics of AI
- · Introduction to **Cyber Security** · Basics of computer hardware
- · Currently doing **Full Stack Open** 2022 and Introduction to Sustainability

Employment History

Keravan Tilipalvelu Oy

JANUARY 2010 — JANUARY 2021

Throughout my tenure at the family business, I effectively managed various responsibilities, including customer communication, accounting, business planning, and marketing. I am especially proud of how I helped to modernize the work flow.

Operator, Neste Oyj

MARCH 2015 — SEPTEMBER 2020

Overseeing and handling logistic operations. Handling cargo paperwork, analyzing product samples and communicating with the ships crew were some of my regular tasks. Attention to detail and great communication skills were essential in this role.
